

August 17, 1998

Dear Water System Manager:

Your water system has a volatile organic chemical (VOC) waiver that expires on December 31, 1998. Enclosed you will find a form for the renewal of that waiver.

The renewal form assumes that no information needs to be updated for your water system with the exception of additional VOC sample results that have been taken since your original waiver was granted. If there have been changes to your water system that could affect possible VOC contamination of your water source, documentation concerning these changes must be included with the renewal form.

ANY WATER SYSTEM THAT DOES NOT RENEW THEIR WAIVER MUST SAMPLE FOR THE VOCs. The laboratory cost for the VOCs is approximately \$155 per sample analyzed. You must either renew your waiver or have completed the 1999-2001 compliance period VOC sampling by December 31, 2001.

Your renewal form should be sent to me at the Drinking Water Program in Pierre. When your renewal is approved, you will receive confirmation of this. If you have any questions on this matter, please contact me at the Drinking Water Program.

Sincerely,

\\S//

Renewal of VOC Waiver

_____ water system is applying to renew the volatile organic chemical (VOC) waiver for the 1999-2004 compliance periods. We have on file with the Department of Environment and Natural Resources (DENR) the following:

1. Hydrological data indicating that our water sources are not vulnerable to VOC contamination for the purposes of obtaining a waiver.
2. A well log or "as-built" well plan indicating that each of our water sources is properly constructed.

Copies of all VOC samples taken since the original waiver was issued must be attached to this renewal form. Results for all regulated VOCs must be "no detect".

We request a renewal of the waiver to cover the following source(s) of water:

Source Name

Year Built

_____	_____
_____	_____
_____	_____
_____	_____

All of the above information is still accurate at this time for our water system.
